

Training Day 23 Report

Date: 30 June 2024

Location: Science & Technology Entrepreneurs' Park

This was the final day of working on my **Student Dashboard** project. I completed the remaining sections and reviewed the full project for responsiveness, user experience, and functionality.

What I Did:

1. Contact & Footer Section:

- Added a simple contact form using Bootstrap form components.
- Included a footer with copyright.

2. Smooth Scrolling:

- Applied `scroll-behavior: smooth;` in CSS to allow smooth navigation between sections when clicking navbar items.

3. Performance & Code Review:

- Cleaned up unnecessary scripts and unused styles.
- Validated the HTML using W3C Validator.
- Optimized JS functions and tested everything again for bugs.

4. Final Testing:

- Tested across different browsers (Chrome, Firefox, Edge).
- Checked mobile responsiveness on various devices.

Summary:

My Student Dashboard project is now complete! It includes a live timetable, attendance tracker, subject tabs, and more. I used HTML, CSS, Bootstrap, and JavaScript efficiently and learned how to manage a larger multi-section project.
