

Training Day 19 Report

Date: 26 June 2024

Location: Science & Technology Entrepreneurs' Park

This was the final day of working on my individual project. I focused on completing the remaining sections – **Projects**, **Hobbies**, and **Contact** – and finalized the overall design.

What I Did:

1. Projects Section:

- Added 2-3 sample projects I had worked on.
- Each project was displayed inside a Bootstrap card with:
 - **Project name** (`<h3>`)
 - **Description**
 - **Link to view the project** (`View`)
 - Optional image or icon

2. Hobbies Section:

- Listed hobbies using styled cards or lists with icons.
- Used CSS to apply background color and rounded corners.

3. Contact Section:

- Created a simple contact form with:
 - Name (`<input type="text">`)
 - Email (`<input type="email">`)
 - Message (`<textarea>`)
 - Submit Button
- Used JavaScript to show a success message when the form is submitted:

```
function submitForm() {  
    alert("Thank you! Your message has been sent.");  
}
```

4. Final Touches:

- Added smooth scroll behavior using CSS (`scroll-behavior: smooth;`).
- Made sure the website was mobile-responsive by testing it on different screen sizes.
- Validated the HTML code to ensure no missing or extra tags.
- Checked all links and buttons were working properly.

Summary:

By the end of **Day 19**, I had successfully completed my personal portfolio website using **HTML**, **CSS**, **Bootstrap**, and **JavaScript**. I learned how to build a fully responsive, visually appealing, and interactive website. This project helped me combine all my learning into a real-world task, and I feel more confident in my front-end web development skills.
